IMPORTANT ANSWERS ABOUT Nasacort®

How is Nasacort different?

“ When you encounter allergens like pollen or pet dander, your body creates a variety of chemical responses that can make you feel miserable. Antihistamines target one of these responses. Nasacort stops more, helping to relieve your worst nasal allergy symptoms, even congestion. ”

Will I feel Nasacort drip?

“ Nasacort is a non-drip formula. It stays where it's sprayed. ”

Is Nasacort better than other OTC allergy medications?

“ The latest medical guidelines suggest that allergy treatments like Nasacort are the most effective class of medicine for moderate to severe allergy sufferers.* ”

Will Nasacort make me drowsy?

“ Nasacort is non-drowsy. ”

Is Nasacort safe to use every day?

“ Nasacort is safe for daily use. ”

Understanding the difference between Allergies, Cold & Flu

The easiest way to determine whether it's a cold or flu, or allergies, is by the symptoms.

Cold and Flu symptoms include:

- chills
- fever
- sore throat
- yellow mucus
- hacking cough
- muscle aches & pains
- strong initial onset of symptoms

Crossover symptoms include:

- runny nose
- nasal congestion
- red, watery eyes
- fatigue or loss of energy

Allergy symptoms include**:

- itchy eyes, ears, nose and throat
- repetitive sneezing
- symptoms that align with seasonal changes
- symptoms that last for more than ten days
- clear mucus

**Nasacort temporarily relieves nasal congestion, sneezing, itchy nose and runny nose associated with indoor and outdoor allergies.

If you still have trouble understanding which symptoms you have or if your symptoms worsen, be sure to consult your doctor or pharmacist.
